Irvine, CA 92602

RE: Senate Bill 1

Dear Senator Choi,

The California Labor Federation is writing in opposition to **SB 1 (The Tax Relief & Spending Cap Act)**,

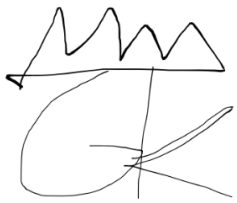

The implementation of a spending cap that cannot be altered without a two-thirds supermajority vote can cause gridlock in the funding of many important services and jobs for Californians.

The limitations on spending the surplus benefit only property owners, employers, and business owners while impacting the lives and benefits of California workers. **SEC 3** funnels money towards the debt, which will limit utilizing the surplus revenue for public services, public jobs, and programs. All of which are integral to not just who we represent but also the standard Californian residents; these public services include but are not limited to child care, housing, and

higher education. Locking up the revenue surplus towards debt is only a veil that hides the dramatic consequences this bill will have upon millions of Californians across the state. The pivoting of tax revenue, as well as relief, creates an issue that will continue to build up and damage the state as a whole.

We strongly advise to review the bill and look at the ramifications that it holds to the lives of many Californian citizens.

Sincerely,

Goblin King - Lobbyist

California Labor Federation
